CO - None

4) Teen Safety Committee - Angela Porter, came to Emergency Response and spoke about a committee that she has started in other Districts. Ted and Rosie will be working with her to get a committee going.

5) Safety Data Sheets - There has been a change in MSDS Sheets. They have been changed to Safety Data Sheets. The District had to do a Global Harmonization Training, which these Safety Data Sheets are part of. There are some cost effective online systems now that will keep all your sheets, it will keep an inventory for us, underground tanks etc. We try to review these on an annual basis, but is quite a task. Chemsafe, our chemical consultant, will inventory annually and also approves all of our purchase orders prior to being ordered. There is very little training for teachers regarding chemicals. Basically, anything that is ordered now, we must get an MSDS Sheet or Safety Data Sheet on it. Beth stated that most places are also trying to keep one paper copy just in case the online version is not accessible.

6) Other - Andy thanked Beth for sending the blog about slipping. Andy forwarded it to staff and got several positive responsive.

Adjourned at 3:55 p.m.
